CAREER OBJECTIVE

Computer Science undergraduate with hands-on experience in Python backend engineering and full-stack development. Proficient in building clean REST APIs, relational database querying, and connecting responsive frontends to server-side logic. Seeking to leverage strong foundational engineering skills as a Python Full-Stack Intern.

INTERNSHIPS

Project Intern - NITTTR – National Institute of Technical Teachers Training and Research

Chennai, India | Dec 2025

Political Multiclass Sentiment Analysis of Tamil X (Twitter)

- Developed a robust NLP pipeline to classify the political sentiment from 10k+ Tamil comments by political parties on X (formerly Twitter).
- Implemented the MuRIL and XLM-RoBERTa transformer models to achieve a 75.66% accuracy across seven distinct political categories.
- Utilized Python and core OOP principles to build a modular data preprocessing and inference pipeline for handling 10k+ data rows.
- Optimized pipeline performance to secure **Rank 19 globally** on Dravidian LangTech (2026) leaderboard.

EDUCATION

B.E. CSE, CGPA:8.90 (till 3rd semester)

Kongu Engineering College 2024-2028

Higher Secondary Education, 81.6%

RD International School 2024

ACHIEVEMENTS

- Rank 19 (Top 20)** – DravidianLangTech@NAACL 2026 Tamil Sentimental Analysis Shared Task using a MuRIL-based classifier.
- Winner** – Exodia’25 Project Expo, Kongu Engineering College.
- Pre-Finalist** – Smart India Hackathon (Internal Round), Kongu Engineering College.
- Finalist** – Techno Cultural Fest 2025, Kongu Engineering College (500+ participants).

AREA OF INTEREST

- Full Stack Development
- Natural Language Processing (NLP)
- 3D Web Graphics (Three.js)

CERTIFICATIONS

- Data processing and visualisation (AI Ready L2 ASCEND)** – Accenture
- Fortinet Certified Fundamentals in Cybersecurity** – Fortinet
- Programming Using C++** – Infosys Springboard (2025)
- English Communication Certification (All Levels)** – Pearson GSE / PTE

PROJECTS

Kongu Campus Explorer– Event Management System

Three.js, React Three Fiber, React, Vercel, PWA

- Engineered an immersive 3D navigation system using Three.js and React Three Fiber, featuring collision detection and WASD controls for 10+ models.
- Optimized performance by implementing custom loading for 9MB GLB models and deploying as a PWA to Vercel with offline service worker caching.

ParivahanPay – Smart Bus Ticketing System

React Native (Expo), Node.js, SQLite, OpenStreetMap.

- Built full-stack cashless bus ticketing platform with conductor and passenger mobile modules, QR-based payment flow and virtual wallet system
- Secured tickets via HMAC-SHA256 signed QR codes with expiry and replay attack prevention.
- Dynamic fare calculation using OpenStreetMap Nominatim and Haversine formula - zero API cost.

The Snooze Club – Anonymous Student Discussion Hub

PHP, MySQL, JavaScript (ES6+), Tailwind CSS, AJAX

- Developed an anonymous student hub featuring real-time group discussions and secure private messaging.
- Engineered a reputation logic system that automates credential point adjustments.
- Designed relational database schemas in MySQL and connected the backend logic with AJAX frontend interactions for seamless, asynchronous data delivery.

SKILLS

- Languages:**
 - Python (Core & OOP), JavaScript (ES6+), Java, C, C++.
- Frontend:**
 - HTML5, CSS3, JavaScript, React.js, Tailwind CSS
- Backend & APIs:**
 - FastAPI, Node.js, Express.js, RESTful APIs, SpringBoot.
- Databases & Data:**
 - SQL (MySQL, PostgreSQL), SQLite.
- AI & ML:**
 - NLP Pipelines (MuRIL, XLM-RoBERTa), RAG concepts.
- Tools & Platforms:**
 - Git, GitHub, Docker (Basics), VS Code, Vercel

LANGUAGES

- English
- Tamil
- Hindi
- Malayalam
